disorders. The Brempton Hospital for Consumptives, London, England, reports that sixty of every 100 victims of consumption also have serious disorders of the kidneys.

Among scientists for the treatment of this dread malady the question is being discussed:

"Is not this disorder the real cause of consumption?" Ten years ago the microscope was omething seldom found in a physician's office; now every physician of standing has one and seldom visits his patients

without calling for a sample of fluids for examination. Why is all this? Is it possible that we of the present generation are to die of diseases caused by kidney disorders? or shall we master the cause by Warner's safe cure, the only recognized specific and thus remove the effects? It is es-tablished beyond a doubt that a very large percentage of deaths in this country are traceable to diseased kidneys. For years the proprietors of Warner's safe en insisting that there is no sound health when the kidneys are diseased, and they eathusiastically press
